

Software Developer (m/f/d) Java

Munich Friedrichshafen

Reference Number: 4485

Your tasks

- As a Software Developer (m/f/d) you develop Java codes for modern, scalable services and other backend components using modern development tools
- You will make changes to existing software and support the qualification of development stages
- Due to the required high quality assurance, you will document your progress and also perform software analyses
- Furthermore, you identify the potential for improvement of the software as well as of tools and processes

Your profile

- You successfully completed your degree in computer science, mathematics, electrical engineering or a comparable study course
- You are familiar with the programming languages Java as well as Eclipse RCP, C/C++ or another high-level programming language
- In addition, you have experience with the development environment NetBeans
- Your communication skills will be supported by your good command of English and ideally German

Our benefits

- Flat hierarchies
- State-of-the-art IT equipment and office supplies
- Individual continuous training options through the "ALLEN Trainings Center" digital learning platform
- Company pension and supplementary health insurance
- Special leave in exceptional circumstances
- Exclusive employee discounts
- Free beverages in our premises
- Corporate events, such as summer and Christmas parties
