

Frontend Developer (m/f/d)

Munich

Reference Number: 4654

Your tasks

- As a Frontend Developer (m/f/d) you are responsible for new and further developments of frontend applications on the basis of Angular
- You contribute your own ideas, but you are also supported by an agile development team at all times
- In addition, you design innovative user interfaces using modern technologies and ensure technical feasibility
- You accompany our product development processes from requirements analysis to the final developed product
- You take care of the continuous optimization and maintenance of the applications and tools

Your profile

- You have a degree in computer science or comparable training
- In addition, you have already gained several years of professional experience in the realization of modern frontend programming with a focus on JavaScript or TypeScript
- You are familiar with HTML, SASS, CSS and have basic knowledge of HTTP protocols and WebSockets
- Furthermore, you are familiar with terms such as state management, microservice architectures and cloud computing
- Your technical knowledge is supported by fluent English skills

Our benefits

- Flat hierarchies
- State-of-the-art IT equipment and office supplies
- Individual continuous training options through the "ALTEN Trainings Center" digital learning platform
- Company pension and supplementary health insurance
- Special leave in exceptional circumstances
- Exclusive employee discounts
- Free beverages in our premises
- Corporate events, such as summer and Christmas parties
