

Engineer semiconductor technology (all gender)

Munich

Reference Number: REF5107X

#weareALTEN - the home of forward thinkers

We are the designers of today for the world of tomorrow.

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

More than 50,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as automotive, aerospace, renewable energy, medical technology and railway technology.

Make it happen

YOU...

- verify mixed-signal designs on block and system level resting upon formal and functional verification
- evaluate semiconductor technologies and their potential with respect to target applications in the RF and microwave frequency range
- conceptualize and program embedded software for electronic devices
- cooperate in a multi-site setting with lab and test engineers, designers, systems architects and verification engineers

Be our forward thinker

YOU...

- have completed degree in electrical engineering, microelectronics, computer science or similar
- have practical experience in the field of digital verification, radio frequency engineering, measurement technology or in the laboratory

- have good knowledge in testing, analyzing with Matlab or Labview or good knowledge of UVM methodology, Specman - e language, scripting languages like Python or Perl
- have good communication skills in English

We value diversity and therefore welcome all applications - regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.

Do you have any questions?
