

# Electrical Aircraft Engineer (all gender)

Berlin

Reference Number: REF8932R

**#weareALTEN - the home of forward thinkers**

**We are the designers of today for the world of tomorrow.**

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

More than 50,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as automotive, aerospace, renewable energy, medical technology and railway technology.

**Make it happen**

**YOU...**

- come with electrical experience from the aerospace, automotive or railway industry
- can develop high and low voltage distribution network architecture, protection devices and installation including bonding
- drive distribution & protection unit design for high and low voltage distribution networks
- are able to perform product development from early prototyping to new product introduction
- support safety processes performing FMEA analysis
- support V&V and change control processes

**Be our forward thinker**

**YOU...**

- successfully completed engineering degree in aerospace or in similar studies
- have experience with turbomachinery, electrical, and general aerospace propulsion and structures
- are organized, enthusiastic and an analytical problem solver

- have very good communication skills in English - German (desirable)

We value diversity and therefore welcome all applications - regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.
