

# Software R&D Engineer (all gender)

Duisburg

Reference Number: REF9038Y

**#weareALTEN - the home of forward thinkers**

**We are the designers of today for the world of tomorrow.**

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

More than 50,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as automotive, aerospace, renewable energy, medical technology and railway technology.

**Make it happen**

**YOU...**

- develop software in C++ on embedded systems and high performance Linux systems
- develop new features
- analyze complex problems to propose and implement new solutions to leading edge technology problems
- close collaborations with solution architects and customer experts

**Be our forward thinker**

**YOU...**

- completed studies in the field of computer science or have practical experience in a similar environment
- have strong programming skills in C++
- bring good Linux / Unix and embedded Linux knowledge
- are experienced with HW interfaces and embedded SW / FW development
- have basic knowledge on software versioning tools (e.g. Git)
- speak fluent English - fluency in German is a plus

We value diversity and therefore welcome all applications - regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.
