Embedded Software Developer Automotive (all gender)

Munich

Reference Number: REF4642E

#weareALTEN - the home of forward thinkers

We are the designers of today for the world of tomorrow.

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

More than 50,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as automotive, aerospace, renewable energy, medical technology and railway technology.

Make it happen

YOU...

- are responsible for programming software modules for embedded systems in the automotive industry, such as control units, driver assistance systems or driver information systems
- integrate software components on the target hardware
- develop test specifications and subsequent execution of module and system tests on the target hardware
- coordinate with related departments and other stakeholders

Be our forward thinker

YOU...

- have completed studies in computer science, electrical engineering or comparable field of study
- gained experience in embedded software development with the programming languages C/C++
- are confident in handling bus systems such as CAN or LIN

- have a good knowledge of English and German

We value diversity and therefore welcome all applications - regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.

Do you have any questions?

Then contact me: Sophia Pollok (Tel.: +49 89/255552278)

Or apply now using our online application form.

A home where people learn and thrive
