

Laboratory Engineer Semiconductor (all gender)

Munich

Reference Number: REF5104A

#weareALTEN - the home of forward thinkers

We are the designers of today for the world of tomorrow.

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

More than 50,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as automotive, aerospace, renewable energy, medical technology and railway technology.

Make it happen

YOU...

- develop suitable setup for verifying the test cases of a new product according to the defined product requirements
- develop appropriate laboratory setups using electronic instruments controlled either manually or by Matlab software and Python
- use electronic measuring instruments like oscilloscope or multimeter
- create precise and high quality measurement reports
- develop PCB layouts with Altium

Be our forward thinker

YOU...

- have completed degree in electrical engineering, microelectronics or similar
- have practical experience in the field of electrical verification or in the laboratory
- have good knowledge in testing, analyzing with Matlab or Labview or good knowledge in scripting languages like Python

- have good communication skills in English

We value diversity and therefore welcome all applications - regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.
