

# Application Engineer Sensor (all gender)

Munich

Reference Number: REF5096A

**#weareALTEN - the home of forward thinkers**

**We are the designers of today for the world of tomorrow.**

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

More than 50,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as automotive, aerospace, renewable energy, medical technology and railway technology.

**Make it happen**

**YOU...**

- are responsible for the complete application engineering process within different sensor products, such as gas sensor, MEMS Microphone, pressure sensor, Radar etc.
- are different testing, from the customer requested characterizations of sensors in the laboratory, analyzing bugs and finding solutions for them
- create application notes and write technical reports
- are working together with all departments that are involved in the product development
- are helping customers worldwide with technical support

**Be our forward thinker**

**YOU...**

- have completed studies in the field of Electrical Engineering or a similar field
- have first work experience in the field of Electrical Engineering

- have practical experience in testing and analyzing with Matlab and Labview and knowledge in comparable layout- and simulation tools
- have very good English language skills

We value diversity and therefore welcome all applications - regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.
