Software Developer Aerospace (all gender)

Munich

Reference Number: REF4714P

#weareALTEN - the home of forward thinkers

We are the designers of today for the world of tomorrow.

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

More than 50,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as automotive, aerospace, renewable energy, medical technology and railway technology.

Make it happen

YOU...

- programme software for safety-critical real-time control systems in the aerospace industry
- specify the software requirements and their implementation in the software design
- initiate the necessary adjustments and coordinate them with the process partners
- transform ideas into implementable solutions
- work in aerospace teams on cutting-edge technology to find best-fit-solutions
- Work on challanges involving diverse interfaces, databases, technologies & stakeholders
- will be part of the digitalization process of the most advanced industries

Be our forward thinker

YOU...

- have a university or college degree in Aerospace, Data Science, Technology Information, Engineering, Physics or in similar studies
- already have at least 2 years of experience in programming languages such as C++, Python and Java

- have practical experience of embedded systems and in software development along the V-model
- speak fluent English, further languages are a plus

We value diversity and therefore welcome all applications - regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.
