

Expert Configuration Manager for Digital Engineering (all gender)

Böblingen

Reference Number: REF19775A

#weareALTEN - the home of forward thinkers

We are the designers of today for the world of tomorrow.

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

More than 50,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as aerospace, renewable energy, medical technology and railway technology.

Make it happen

YOU...

- lead Digital Engineering projects and contribute to the evolution of Digital Engineering capabilities and roadmaps
- act as a subject matter expert for engineering methods, data models, workflows and digital engineering best practices
- collaborate with R&D, Supply Chain, IT and other stakeholders to align business requirements and digital solutions
- drive the implementation of Digital Engineering solutions, including methods, processes, data structures and tooling
- support pilots, rollouts and user adoption through coaching, knowledge transfer and training activities
- analyze engineering workflows and identify opportunities to improve efficiency, quality, traceability and digital maturity
- contribute to the definition and monitoring of KPIs and metrics to assess the effectiveness of Digital Engineering solutions

Be our forward thinker

YOU...

- hold a university degree in Electrical Engineering, Mechatronics, Mechanical Engineering, Computer Science, or a comparable technical discipline
- have comprehensive experience in Digital Engineering, Engineering Methods & Tools, PLM, Systems Engineering or Engineering Process Management
- have experience working with engineering toolchains such as Windchill, Siemens NX, Xpedition, Jira, Confluence or comparable solutions
- understand engineering data structures, product configurations, change management and engineering workflows
- have successfully driven process improvements, rollouts, digitalization initiatives or tool implementations
- can translate business requirements into practical and sustainable digital solutions
- enjoy working at the interface between Engineering, IT and Business stakeholders
- work independently, analytically and solution-oriented in complex engineering environments

We value diversity and therefore welcome all applications - regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.

Apply now using our online application form.

A home where people learn and thrive

- **Talent Management** - we develop your career
