

Software Verification and Validation Engineer (all gender)

Donauwörth

Reference Number: REF20339N

#weareALTEN - the home of forward thinkers

We are the designers of today for the world of tomorrow.

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

Nearly 60,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as aerospace, renewable energy, medical technology, railway technology and automotive.

Make it happen

YOU

- analyze system and software requirements to ensure full traceability
- analyze change requests as well as perform defect analysis and root cause analysis
- create, execute, and document test procedures on the test benches within the RISE Environment
- conduct regression testing and prepare certification evidence and compliance documentation
- troubleshoot using SCADE diagrams and support bug fixing activities

Be our forward thinker

YOU

- have experience with AFCS (Automatic Flight Control Systems) / Flight Control Systems
- have strong knowledge of SCADE or Simulink as well as good understanding of avionic systems
- are experienced with test benches and able to execute a test case (initialisation, malfunction injections, troubleshooting)

- worked on Projects with Software Verification and Validation (V&V) and are familiar with DO-178C and safety-critical software development
- speak English on a Business fluent level

We value diversity and therefore welcome all applications – regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age, sexual orientation, and identity.

Severely disabled persons will be given preferential consideration if equally qualified.

Apply now using our online application form.
