AI Engineering Consultant (all gender)

Munich

Reference Number: REF21288X

#weareALTEN - the home of forward thinkers

We are the designers of today for the world of tomorrow.

As one of the world's leading engineering service providers, we at ALTEN are committed to positively shaping the future of our partners, the careers of our employees and the challenges facing our society and environment.

Nearly 60,000 employees in 30 countries are already working on innovative solutions in various engineering and IT sectors such as aerospace, renewable energy, medical technology, railway technology and automotive.

Make it happen

YOU...

- analyze current engineering and software development processes to identify opportunities for AI-driven improvements
- identify, evaluate and prioritize AI use cases within software and engineering teams
- design, develop and implement AI agents to optimize engineering workflows and development activities
- define scalable agent-based frameworks including human review, approval and governance mechanisms
- develop reusable AI workflows, templates, prompt libraries and best practices for engineering organizations
- support the integration of AI capabilities into existing software and hardware development toolchains
- collaborate with development teams to establish efficient AI-supported engineering processes
- conduct workshops, coaching sessions and knowledge transfer activities to enable successful AI adoption
- support pilot projects and proof-of-concept initiatives for AI-enabled engineering solutions
- establish governance, compliance and quality assurance concepts for AI-generated outputs
- work closely with stakeholders to drive organizational change and increase AI maturity within development environments

Be our forward thinker

YOU...

- have successfully completed studies in Computer Science, Software Engineering, Data Science, Artificial Intelligence or a comparable field
- have professional experience in software development, AI consulting, AI transformation or engineering process optimization
- possess strong knowledge of Generative AI technologies, AI agents and modern AI-assisted development approaches
- have hands-on experience with Microsoft Copilot and GitHub Copilot in professional environments
- are familiar with Azure AI Services, Azure AI Foundry and cloud-based AI solutions
- have experience designing and implementing AI agent frameworks and agent-based architectures
- understand Retrieval-Augmented Generation (RAG) architectures and knowledge management concepts
- are proficient in Python and have working knowledge of JavaScript / TypeScript and SQL
- have experience with Azure DevOps, Jira, Git and modern CI/CD toolchains
- communicate confidently in English; German language skills are considered a plus

We value diversity and therefore welcome all applications regardless of gender, nationality, ethnic and social origin, religion/belief, disability, age and sexual orientation and identity.

Severely disabled persons will be given preferential consideration if they are equally qualified.

Apply now using our online application form.

A home where people learn and thrive

- **Talent Management -** we develop your career
- **Work life balance -** flexible working hours and mobile working possible
- **Fit and relaxed –** with EGYM Wellpass
- **Enjoy biking –** always on tour with bike leasing
- **Green Mobility** – with us you can travel at a reduced rate

…in addition we offer a permanent employment contract, corporate benefits and team events.
